(54) Title: COSMETIC COMPOSITION COMPRISING A TENSIONING AGENT AND A PARTICULAR BLOCK ETHYLENIC POLYMER

(57) Abstract: The present invention relates to a cosmetic composition adapted for a topical application on the skin, especially an anti-wrinkle composition, comprising, in a medium compatible with the skin: at least one tensioning agent, the said tensioning agent being present in a content ranging from 0.01% to 20% relative to the total weight of the composition; and at least one non-elastomeric, water-in soluble film-forming linear block ethylenic polymer, the said polymer being present in a content ranging from 0.01% to 20% relative to the total weight of the composition. This composition makes it possible to give a remanent tensioning effect to the skin to which it is applied.
